

Multinational Sampling Survey Designs

UNIVERSITY OF HELSINKI

Aims:

- Achieve a high quality for each nation for a survey so that
 - Estimates are well cross-country comparable.
- These
- concerning both point estimates and interval (variance) estimates

Strategic components:

- Units in frame population vs. in study population
- Stages
- Phases
- Stratification
- Methods for selection
- Expectations for missingness, coverage and measurement errors
- Learning for the next steps

Research Network

Members:

- Peter Lynn
University of Essex, UK:
Siegfried Gabler and
Sabine Häder
ZUMA, Mannheim, Germany
Ray Chambers
University of Southampton, UK
Keith Rust
Westat, US
Partha Lahiri
University of Maryland, US

Current reference surveys: The European Social Survey, rounds 1 and 2, The EU Innovation Survey, The PISA survey and The Structural Earnings Survey
